To: Harold Weisberg

Dear Mr. Weisberg,

In your books Post Mortem and Never Again you state that Dr. Carrico told you in an interview that President Kennedy's throat wound was above the collar.

My question is: Did you tape record this interview? In other words, do you have a tape of Dr. Carrico saying the wound was above the collar?

Do you know if Dr. Carrico was aware that you were quoting him as saying the throat wound was above the collar?

I'm greatly impressed with your research, and I look forward to hearing from you.

Sincerely,
Michael T. Griffith
